Institut für Optimierung und Diskrete Mathematik

Vortrag im Seminar Diskrete Mathematik und Optimierung

Dienstag 01.07.2014, 14:15

Seminarraum C208, Steyrergasse 30, 2. Stock

Working on Mathematica Online at Wolfram Research

Jan Pöschko

(Kernel Developer, Wolfram Research)

In this informal talk, I will speak about my job at Wolfram Research, how I got there, and what I am currently doing. I will give a brief introduction to Mathematica and the Wolfram Language, what I think is great about it, and highlight some recent developments. The project I am mostly working on is the Wolfram Cloud, with a web-based version of Mathematica at its core, offering interesting new ways to share documents and deploy software. I will give a quick demo and discuss some of the challenges and lessons learnt. I will also say a few words about working and living in the USA in general.
